

Journal of the Kansas Entomological Society

INFORMATION SHEET
MANUSCRIPT # 0803.06

Reviewer #2 [redacted] JKES 0803.06

YES NO

- Is this paper appropriate for the Journal of the Kansas Entomological Society? If no, please comment below, use more sheets if needed.
- Are the objectives clear; do the results justify the conclusions? If no, please comment.
- NA Are statistical applications thorough, appropriate and accurate? If no, please comment.
- Are additional experiments required before this paper is ready for publication? If yes, please comment.
- Do any of the figures or tables require deletion or revision? If yes, please comment.
(I would have preferred a left view in figure 1; none of the figures are beautiful, but I would not reject on that account; A habitus figure of the holotype dryinid seems appropriate, but is not included.)
- Is the abstract accurate, and does it clearly and accurately summarize the findings presented in the manuscript? If no, please comment.
- Is the manuscript of appropriate length in relation to its merit. If no, please comment.
- Are all of the tables and figures clear and essential? If no, please comment.
(Line drawings are good, the photographs are adequate.)
- Is the work preliminary or inconclusive? If yes, please comment.
