Fundacion Campomar  
Julian Alvarez 1719  
Buenos Aires, Argentina

Dear Dr. Leloir:

I have heard from Dr. Dean Clark that you are seriously considering a formal offer on the part of the Massachusetts General Hospital to come there to take over the laboratories of Dr. Lipmann. Naturally I am delighted to see that proceedings have reached this stage of development, and I would like to add my sincere wish to those of other Boston biochemists that you come here.

Needless to say, we enjoyed your visit here last spring tremendously and will be looking forward to the stimulation which you would bring us and which has been such an important tradition in Dr. Lipmann's laboratory.

Sincerely yours,

*Jack Buchanan*
