SAN2020
E-BOOK

Welcome

In the context of the COVID19 pandemic, the XXXV Annual Meeting of the Argentinian Society for Neuroscience Research took place under a ***virtual*** *format, opening an opportunity to widely reach the neuroscience community in Argentina and abroad.*

Conserving the classical structure the meeting included ***plenary lectures***, ***symposia***, ***young investigator talks*** *and* ***poster presentations***, *as well as* ***round tables*** *discussing career advancement, work environment topics and a special event dedicated to LATBrain (Latin American Brain Iniciative).*

The meeting was supported, as every year, on the principles of ***scientific excellence*** *and* ***nationwide representation, with a special emphasis in gender equality***.

EXECUTIVE BOARD SAN

DR. LILIANA CANCELA, PRESIDENT
IFEC (UNC-CONICET) / DF (FCQ-UNC)

DR. MARTA ANTONELLI, VICE-PRESIDENT
IBCN-CONICET, FMED UBA

DR. MARIO GUIDO, PAST-PRESIDENT
CIQUIBIC (FCQ, UNC-CONICET)

DR. MARÍA ANA CONTÍN, SECRETARY
CIQUIBIC (FCQ, UNC-CONICET)

DR. JUAN E. FERRARIO, TREASURER
IB3 (UBA), CONICET / DFBMC (FCEN-UBA)

DR. MARCELA BROCCO, VOCAL
INSTITUTO DE INVESTIGACIONES BIOTECNOLÓGICAS (IIB-UNSAM)

DR. PATRICIA SETTON, VOCAL
IQUIFIB (UBA-CONICET) / FFYB UNIVERSIDAD DE BUENOS AIRES.

DR. NICOLÁS UNSAÍN, VOCAL
INIMEC (UNC-CONICET)

ORGANIZING COMMITTEE

DR. LILIANA CANCELA
IFEC (UNC-CONICET) / DF (FCQ-UNC)
DR. VERÓNICA DE LA FUENTE
IFIBYNE (UBA-CONICET) / DFBMC (FCEN-UBA).
DR. JUAN FERRARIO
IB3 (UBA), CONICET / DFBMC (FCEN-UBA)
DR. GRACIELA MAZZONE
IIMT (UA-CONICET) / UNIVERSIDAD AUSTRAL, FCB Y CONICET.
DR. SANTIAGO OJEA RAMOS
IFIBYNE (UBA-CONICET).
DR. ALEJANDRA PACCHIONI
FCBYF – UNR / CONICET.
DR. LORENA RELA
IFIBIO HOUSSAY (UBA-CONICET) / FISIOLOGÍA (FMED-UBA)
DR. PATRICIA SETTON
IQUIFIB (UBA-CONICET) / FFYB UBA
DR. AZUL SILVA
IFIBIO HOUSSAY (UBA-CONICET)
DR. NICOLÁS UNSAIN
INIMEC (UNC-CONICET)

CELLULAR AND MOLECULAR NEUROBIOLOGY

A new antagonist of Caenorhabditis elegans glutamate-activated chloride channels with anthelmintic activity

Nematode parasitosis causes mortality and morbidity in humans and losses in livestock and domestic animals. The acquisition of resistance to current anthelmintic drugs has prompted the search for new compounds for which the nematode Caenorhabditis elegans has emerged as a valuable platform. We have previously synthetized a library of compounds and determined that dibenzo[b,e]oxepin-11(6H)-one (doxepinone) reduces swimming rate, induces paralysis, and decreases the rate of pharyngeal pumping on C. elegans. To identify the drug targets, we performed a screening of strains carrying mutations in Cys-loop receptors involved in worm locomotion for determining resistance to doxepinone effects. A mutant strain that lacks subunit genes of the glutamate-gated chloride channels (GluCl), which are targets of the antiparasitic ivermectin, is resistant to doxepinone effects. To unravel the molecular mechanism, we measured whole-cell currents from GluClα1/β receptors expressed in mammalian cells. Glutamate elicits macroscopic currents whereas no responses are elicited by doxepinone, indicating that it is not an agonist of GluCls. Preincubation of the cell with doxepinone produces a significant decrease of the decay time constant and net charge of glutamate-elicited currents, indicating that it inhibits GluCls. Thus, we identify doxepinone as an attractive scaffold with promising anthelmintic activity and propose the inhibition of GluCls as a potential anthelmintic mechanism of action.
