

SINEANCYLUS, NOM. NOV.: A REPLACEMENT NAME FOR
ANANCYLUS GUTIÉRREZ GREGORIC, 2012 (GASTROPODA, ANCYLIDAE)

Diego Eduardo Gutiérrez Gregoric

División Zoología Invertebrados, Museo de La Plata, Facultad de Ciencias Naturales y Museo, Universidad Nacional de La Plata, La Plata, Buenos Aires, Argentina and Consejo Nacional de Investigaciones Científicas y Técnicas (CONICET); dieguty@fcnym.unlp.edu.ar

Nestor Cazzaniga (Universidad Nacional del Sur, Argentina) and Philippe Bouchet (Museum National d'Histoire Naturelle, France) have kindly advised me of homonymy in the generic name *Anancylus* Gutiérrez Gregoric, 2012, proposed for an Ancyliidae from Iguazú National Park, Argentina (Gutiérrez Gregoric, 2012: 109). The name is preoccupied by *Anancylus* Thomson, 1864 (Coleoptera, Cerambycidae) (Neave, 2005). Thus, in accordance with Articles 53.3 ("Homonyms in the genus group") and 60 ("Replacement of junior homonyms") of the *International Code of Zoological Nomenclature* (ICZN, 1999), I propose the replacement name *Sineancylus*, nom. nov.

Family Ancyliidae
Rafinesque, 1815
Sineancylus, nom. nov.

Type Species

Anancylus rosanae Gutiérrez Gregoric, 2012.

Etymology

Sine (Latin) = without; *ancylus* (Latinized Greek) = curved as a hook. Gender masculine.

Diagnosis

See Gutiérrez Gregoric (2012).

Sineancylus rosanae
(Gutiérrez Gregoric, 2012)
comb. nov.

Anancylus rosanae Gutiérrez Gregoric, 2012:
109; original description.

Type Material

Holotype (MLP 13219); paratypes (MLP 13220) housed at Museo de La Plata, Argentina.

Type Locality

Upper Iguazú River, Iguazú National Park, Misiones Province, Argentina.

Diagnosis

See Gutiérrez Gregoric (2012).

ACKNOWLEDGEMENTS

I thank N. Cazzaniga and P. Bouchet for the information provided.
