## Corrigendum

## Corrigendum to “The late Neoproterozoic Sierra de las Ánimas Magmatic Complex and Playa Hermosa Formation, southern Uruguay, revisited: Paleogeographic implications of new paleomagnetic and precise geochronologic data” [Precambrian Res. 259 (2015) 143–155]

Augusto E. Rapalini <sup>a,\*</sup>, Eric Tohver <sup>b</sup>, Leda Sánchez Bettucci <sup>c</sup>, Ana C. Lossada <sup>a,d</sup>, Hernán Barcelona <sup>e</sup>, Cecilia Pérez <sup>c</sup>

The authors regret that Table 3 erroneously presented the positions and A95 of the Sierra de las Ánimas Magmatic Complex and Playa Hermosa Formation rotated into African coordinates. The corrected Table 3 is furnished below.

The authors would like to apologize for any inconvenience caused.

**Table 3**

Selected Ediacaran to Cambrian paleomagnetic poles for the Río de la Plata, Congo-Sao Francisco, West Africa, Laurentia and Baltica illustrated in Figs. 9–11. Poles from Gondwana cratons have been rotated into African coordinates according to Reeves et al. (2004) and Trindade et al. (2006).

Geologic unit	PP	Lat	Long	A95 (dp/dm)	Age (Ma)	Method	References
<i>Río de la Plata craton</i>							
Cerro Victoria F. (remag)	CVc	28.8°	13.2°	11°/16°	500?	APWP	Rapalini and Sanchez Bettucci (2008)
Sierra de Animas (remag)	SA1	22.9°	8.7°	20°/27°	520?	K-Ar, APWP	Sánchez Bettucci and Rapalini (2002)
Cerro Negro F	SBC	17.9°	354.4°	10°/13°	520?	Strat. & APWP	Rapalini et al. (2013)
Polanco F. (remag)	P	15.4°	359.3°	14°/17°	520?	APWP	Rapalini and Sanchez Bettucci (2008)
Olavarría F.	SBd	4.0°	322.8°	6°/9°	535?	APWP	Rapalini et al. (2013)
Los Barrientos	LB	−47.0°	312.9°	11°/14°	570?	APWP	Rapalini (2006)
Sierra de las Animas Complex	SAn	−41.2°	317.6°	15°	578	U-Pb, Ar/Ar	This paper
Cerro Largo F.	SBe	−66.9°	257.3°	8°/14°	580?	APWP	Rapalini et al. (2013)
